CHILSON TABLE AND BENCH SET

Cement
CTCT01

Care Instructions

For daily care, wipe with a soft dry cloth and avoid the use of harsh cleaners and abrasives. The table top is made from a cement fibre material which is very weather proof. The surface is hardwearing but should not be dropped or man-handled otherwise it may scratch or chip. To help prolong its life we recommend that the furniture is covered if left outside for long periods of time.
